Science Milestones

	Milestone 1	Milestone 2	Milestone 3	Milestone 4
	By the end of Reception	By the end of Year 2	By the end of Year 4	By the end of Year 6
ELG 14 The world	Children know about similarities and differences in relation to places, objects, materials and living things They talk about the features of their own immediate environment and how environments might vary from one another They make observations of animals and plants and explain why some things occur, and talk about changes			
NC Programmes of				
Study				
Plants		identify and name a variety of common wild and garden plants, including deciduous and evergreen trees identify and describe the basic structure of a variety of common flowering plants, including trees observe and describe how seeds and bulbs grow into mature plants find out and describe how plants need water, light and a suitable temperature to grow and stay healthy.	identify and describe the functions of different parts of flowering plants: roots, stem/trunk, leaves and flowers explore the requirements of plants for life and growth (air, light, water, nutrients from soil, and room to grow) and how they vary from plant to plant investigate the way in which water is transported within plants explore the part that flowers play in the life cycle of flowering plants, including pollination, seed formation and seed dispersal.	

	Milestone 1	Milestone 2	Milestone 3	Milestone 4
	By the end of Reception	By the end of Year 2	By the end of Year 4	By the end of Year 6
Animals including humans		identify and name a variety of common animals including fish, amphibians, reptiles, birds and mammals	identify that animals, including humans, need the right types and amount of nutrition, and that they cannot make their own food; they	describe the changes as humans develop to old age. identify and name the main parts of the human circulatory system, and
		identify and name a variety of common animals that are carnivores, herbivores and omnivores describe and compare the structure of a variety of common animals (fish, amphibians, reptiles, birds and mammals, including pets) identify, name, draw and label the basic parts of the human body and say which part of the body is associated with each sense notice that animals, including humans, have offspring which grow into adults find out about and describe the basic needs of animals, including humans, for survival (water, food and air) describe the importance for humans of exercise, eating the right amounts of different types of food, and hygiene.	identify that humans and some other animals have skeletons and muscles for support, protection and movement. describe the simple functions of the basic parts of the digestive system in humans identify the different types of teeth in humans and their simple functions construct and interpret a variety of food chains, identifying producers, predators and prey.	describe the functions of the heart, blood vessels and blood recognise the impact of diet, exercise, drugs and lifestyle on the way their bodies function describe the ways in which nutrients and water are transported within animals, including humans.

	Milestone 1	Milestone 2	Milestone 3	Milestone 4
	By the end of Reception	By the end of Year 2	By the end of Year 4	By the end of Year 6
Everyday materials (KS1) Properties and changes of materials (KS2)		By the end of Year 2 distinguish between an object and the material from which it is made identify and name a variety of everyday materials, including wood, plastic, glass, metal, water, and rock describe the simple physical properties of a variety of everyday materials compare and group together a variety of everyday materials on the basis of their simple physical properties. identify and compare the suitability of a variety of everyday materials, including wood, metal, plastic, glass, brick, rock, paper and cardboard for particular uses find out how the shapes of solid objects made from some materials		
		objects made from some materials can be changed by squashing, bending, twisting and stretching.		demonstrate that dissolving, mixing and changes of state are reversible changes
				explain that some changes result in the formation of new materials, and that this kind of change is not usually reversible, including changes associated with burning and the action of acid on bicarbonate of soda.

	Milestone 1	Milestone 2	Milestone 3	Milestone 4
	By the end of Reception	By the end of Year 2	By the end of Year 4	By the end of Year 6
Seasonal changes		observe changes across the four seasons observe and describe weather associated with the seasons and how day length varies.		
Living things and their habitats		explore and compare the differences between things that are living, dead, and things that have never been alive identify that most living things live in habitats to which they are suited and describe how different habitats provide for the basic needs of different kinds of animals and plants, and how they depend on each other identify and name a variety of plants and animals in their habitats, including micro-habitats describe how animals obtain their food from plants and other animals, using the idea of a simple food chain, and identify and name different sources of food.	recognise that living things can be grouped in a variety of ways explore and use classification keys to help group, identify and name a variety of living things in their local and wider environment recognise that environments can change and that this can sometimes pose dangers to living things.	describe the differences in the life cycles of a mammal, an amphibian, an insect and a bird describe the life process of reproduction in some plants and animals. describe how living things are classified into broad groups according to common observable characteristics and based on similarities and differences, including micro-organisms, plants and animals give reasons for classifying plants and animals based on specific characteristics.

	Milestone 1	Milestone 2	Milestone 3	Milestone 4
	By the end of Reception	By the end of Year 2	By the end of Year 4	By the end of Year 6
Rocks			compare and group together	
			different kinds of rocks on the	
			basis of their appearance and	
			simple physical properties	
			describe in simple terms how	
			fossils are formed when things	
			that have lived are trapped within	
			rock	
			recognise that soils are made from rocks and organic matter.	
Light			recognise that they need light in	recognise that light appears to
			order to see things and that dark is	travel in straight lines
			the absence of light	use the idea that light travels in
			notice that light is reflected from	straight lines to explain that objects
			surfaces	are seen because they give out or
			recognise that light from the sun	reflect light into the eye
			can be dangerous and that there	explain that we see things because
			are ways to protect their eyes	light travels from light sources to
			recognise that shadows are formed	our eyes or from light sources to
			when the light from a light source	objects and then to our eyes
			is blocked by a solid object	use the idea that light travels in
			find patterns in the way that the size of shadows change.	straight lines to explain why shadows have the same shape as the objects that cast them.

	Milestone 1	Milestone 2	Milestone 3	Milestone 4
	By the end of Reception	By the end of Year 2	By the end of Year 4	By the end of Year 6
Forces and magnets			compare how things move on	
			different surfaces	
			notice that some forces need	
			contact between two objects, but	
			magnetic forces can act at a	
			distance	
			observe how magnets attract or	
			repel each other and attract some	
			materials and not others	
			compare and group together a	
			variety of everyday materials on	
			the basis of whether they are	
			attracted to a magnet, and identify	
			some magnetic materials	
			describe magnets as having two	
			poles	
			predict whether two magnets will	
			attract or repel each other,	
			depending on which poles are	
			facing.	

	Milestone 1	Milestone 2	Milestone 3	Milestone 4
	By the end of Reception	By the end of Year 2	By the end of Year 4	By the end of Year 6
States of matter			compare and group materials together, according to whether they are solids, liquids or gases observe that some materials change state when they are heated or cooled, and measure or research the temperature at which this happens in degrees Celsius (°C) identify the part played by evaporation and condensation in the water cycle and associate the rate of evaporation with	
Sound			identify how sounds are made, associating some of them with something vibrating recognise that vibrations from sounds travel through a medium to the ear find patterns between the pitch of	
			a sound and features of the object that produced it find patterns between the volume of a sound and the strength of the vibrations that produced it recognise that sounds get fainter as the distance from the sound source increases	

	Milestone 1	Milestone 2	Milestone 3	Milestone 4
	By the end of Reception	By the end of Year 2	By the end of Year 4	By the end of Year 6
Electricity	by the end of Reception	by the end of fear 2	identify common appliances that run on electricity construct a simple series electrical circuit, identifying and naming its basic parts, including cells, wires, bulbs, switches and buzzers identify whether or not a lamp will light in a simple series circuit, based on whether or not the lamp is part of a complete loop with a battery recognise that a switch opens and closes a circuit and associate this with whether or not a lamp lights in a simple series circuit recognise some common conductors and insulators, and associate metals with being good conductors.	associate the brightness of a lamp or the volume of a buzzer with the number and voltage of cells used in the circuit compare and give reasons for variations in how components function, including the brightness of bulbs, the loudness of buzzers and the on/off position of switches use recognised symbols when representing a simple circuit in a diagram.
Earth and space				describe the movement of the Earth, and other planets, relative to the Sun in the solar system describe the movement of the Moon relative to the Earth describe the Sun, Earth and Moon as approximately spherical bodies use the idea of the Earth's rotation to explain day and night and the apparent movement of the sun across the sky.

	Milestone 1	Milestone 2	Milestone 3	Milestone 4
	By the end of Reception	By the end of Year 2	By the end of Year 4	By the end of Year 6
Forces				explain that unsupported objects
				fall towards the Earth because of
				the force of gravity acting between
				the Earth and the falling object
				identify the effects of air resistance,
				water resistance and friction, that
				act between moving surfaces
				recognise that some mechanisms,
				including levers, pulleys and gears,
				allow a smaller force to have a
				greater effect.
Evolution and				recognise that living things have
Inheritance				changed over time and that fossils
				provide information about living
				things that inhabited the Earth
				millions of years ago
				recognise that living things produce
				offspring of the same kind, but
				normally offspring vary and are not
				identical to their parents
				identify how animals and plants are
				adapted to suit their environment in
				different ways and that adaptation
				may lead to evolution.
